Education

University of Calgary

BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING CANDIDATE

- Minor in Computer Engineering

Calgary, Canada

April 2021 (Expected)

Skills

Languages Java | Kotlin | C++ | Python | C | C# | SQL | Javascript
Technologies Git | Android | JIRA | Microsoft Azure | Junit | React.js | Express.js | Node.js

Work Experience

Zephyr Sleep Technologies

SOFTWARE DEVELOPMENT INTERN

- Worked on the development of software used by thousands of patients to diagnose and perform Sleep Apnea Studies
- Worked on updating the legacy Windows 8.1 store app to work with the new API
- Redesigned the navigation logic of the Android App to fix life cycle related issues causing crashes
- Reduced risk of API release by developing a mechanism to allow developers to roll back to a previous API version
- Improved testing infrastructure of the Android App by introducing UI tests to the testing suite
- Performed numerous feature additions and bug fixes on Windows and Android applications

Calgary, Canada

June 2019 - March 2020

YMCA

CAMP COUNSELOR

- Planned and coordinated play-based learning activities for kids of various ages
- Facilitated a safe and positive learning environment for summer campers

Calgary, Canada

June 2015 - August 2015

Projects and Extracurriculars

Music Transfer

PERSONAL PROJECT

- Created a webapp that allows users to easily transfer multiple playlists between Spotify accounts
- Implemented the Front-end application using React.js
- Built a Rest server using Node.js and Express.js

Calgary, Canada

November 2020

Uofc Empty Course Seats Finder

PERSONAL PROJECT

- Automated the process of finding empty seats in courses at the University of Calgary using Python
- The tool allows users to check multiple courses at once making it easy to use

Calgary, Canada

October 2020

University of Calgary Schulich Off-Road Team

ELECTRICAL ENGINEERING TEAM MEMBER

- Assisted our team which competed internationally against other teams
- Worked primarily with the electrical team but assisted the mechanical team with car assembly
- Worked on telemetry to acquire sensor data from the vehicle remotely using an Arduino

Calgary, Canada

September 2017 - September 2018

CalgaryHacks

HACKATHON

- Developed a car safety system kit in a team of four using particle electron kit
- Setup the microcontroller to send data to a provided IoT cloud-based platform
- The kit reported engine temperature, speed and proximity alerts to an Android application
- It used temperature, accelerometer and distance sensors to report the alerts to the application
